

# **STAMPING AND AUTOMATIC FORMING**

# INTRODUCTION

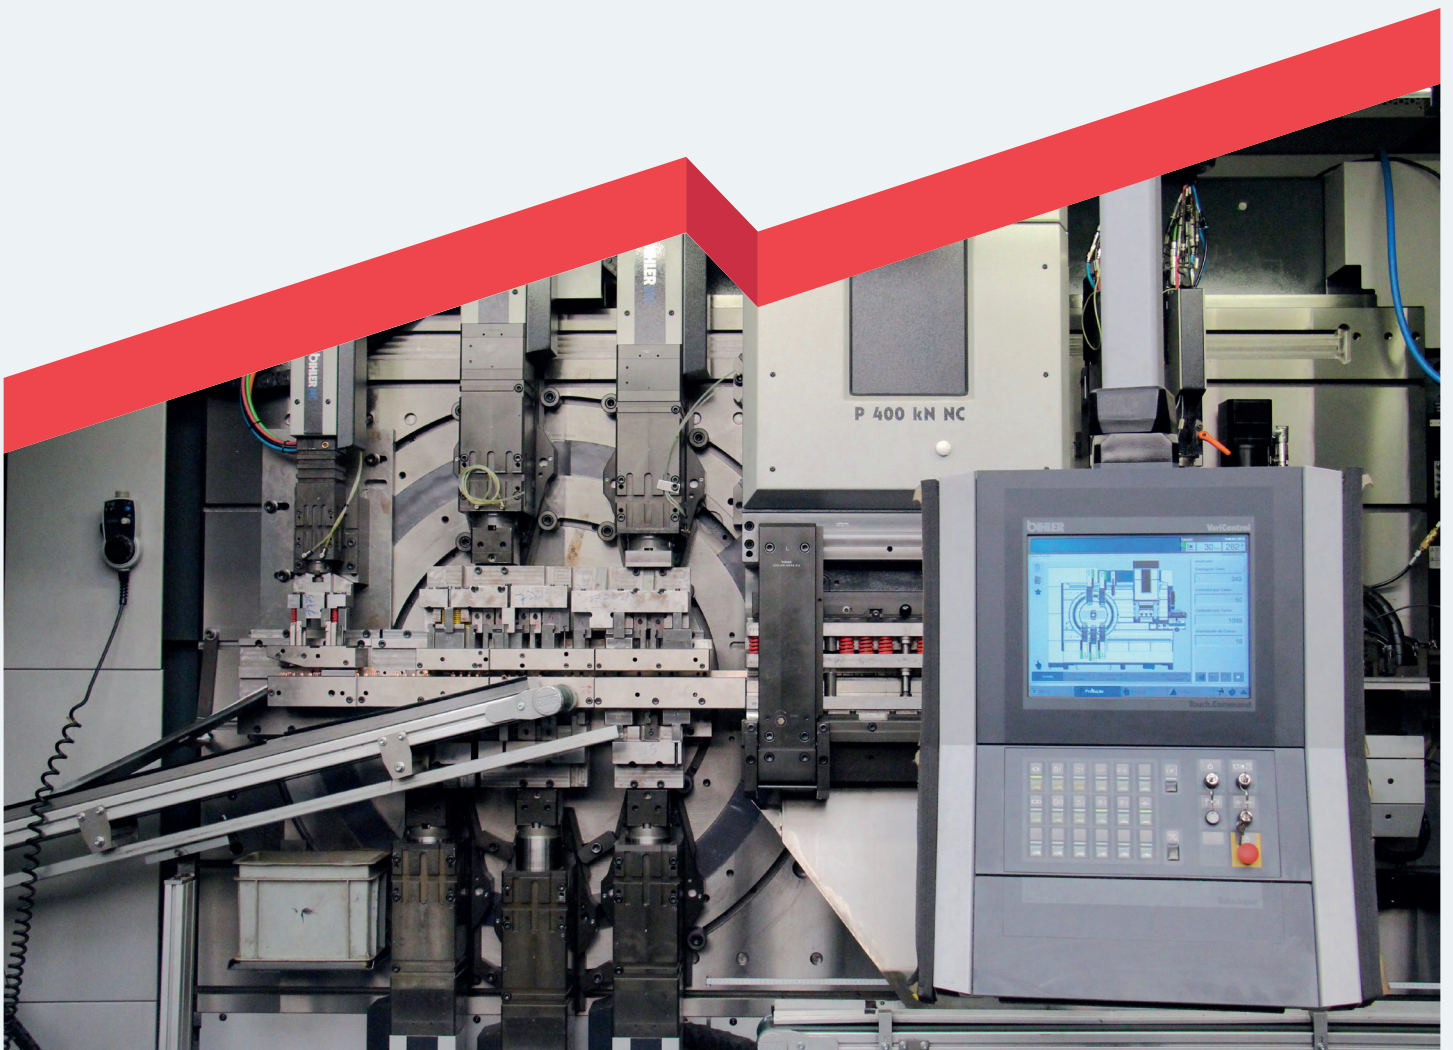

The way we work with our customers is the joint development of tailor-made solutions with the objective of finding the best for each order.

We believe this is what differentiates ourselves from the competition and adds value to our customers.

We manufacture from metal strip stamped parts up to 3mm thick and 400mm wide. The production capacity of ETMA is ensured by the diversity and experience of over 75 years in stamping processes.

We work with progressive tools, deep drawing, Bihler forming machines, precision quick presses.

# TECHNICAL TEAM

The search for custom-made solutions that meet the needs of each client involves our development and commercial teams.

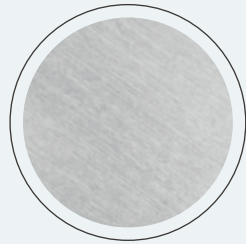

Sharing knowledge and experience between our team and the clients results in synergies with mutual benefits.

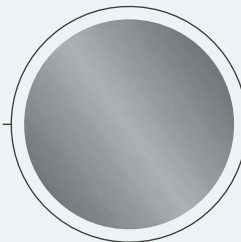

# RAW MATERIALS

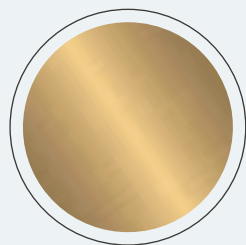

We work with the same rigor and quality, several raw materials.

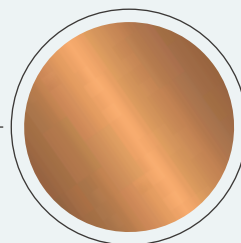

• **ALUMINUM**

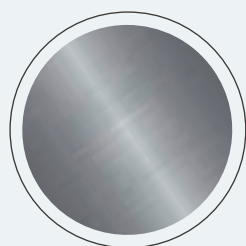

• **STAINLESS  
STEEL**

• **BRASS**

• **COPPER**

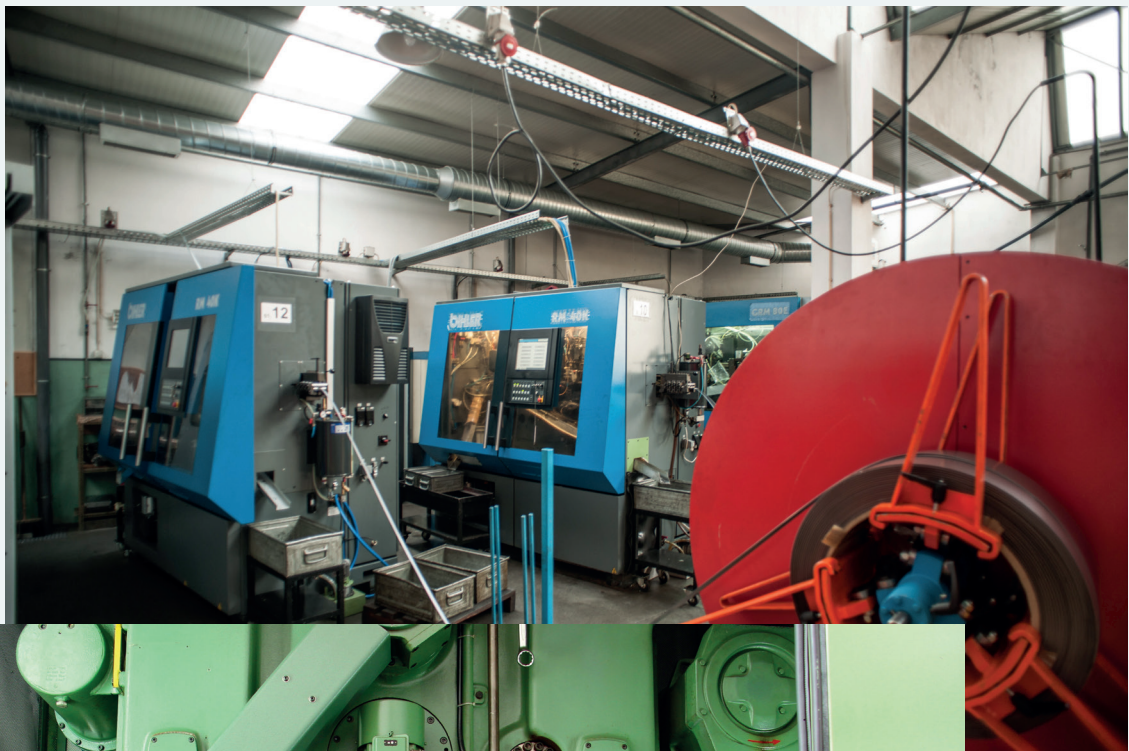

• **STEEL**

# EQUIPMENTS

- Eccentric presses from 12 to 250 T and Bruderer quick presses: Helmerding TPH12, Ross 40T, Ross 80T , Press Ross 50T, Press Ross 63T, Press Ross 105T, Yangli JMD31-250, Bruderer BSTA 50 e Legnani DMC T80, Yangli
- Automatic forming machines: Bihler GRM NC, GRM-80 E, RM 40K, RM-25, RM-30, RM- 35, GRM-50 e Franconi B20

# DO YOU KNOW ETMA 10 PROCESSES?

Over 3 generations, we have been evolving in the areas where we operate and in the production processes we have mastered. We currently produce metal parts using **10 production processes** and ensure that a customer walks with us from the design to the final piece. This ensures the following advantages:

- Cost reduction (logistics & quality)
- Quality control
- Flexibility

To find out if the 10 productive processes we have can help you in your project just download our catalog or contact us directly.
